WASHINGTON, D.C.

Oct 11. 1917.

Sir Robert Falconer

Dear Sir

It is quite possible that I may be down here for another week and I thought I ought to write to you & let you know that the project we are on may -according to the British experts- revolutionize aerial warfare & therefore

Dear Mr President-

I have received your circular re students canvassing for the Victory Loan. In my opinion the canvassing can be overdone, also the students and demonstrators who are medically fit & of age should go and fight instead of asking for exemptions & then wasting their time on jobs of the above nature. I cannot promise that I will devote any extra time to students who take holiday in the way mentioned. Personally I say that those who absent themselves from my classes do so at your own risk.

DEPARTMENT OF PHYSICS

In any case
I do not see how any one can promise that "no student will suffer on this account through non-attendance or in the examinations"
What will happen is this: in the Spring hosts of students who fail or think they are going to fail will give Victory Loan as their excuse

I am
Yours very truly
John Satterly
